Sean-Bailey Mkhabela

Frontend Engineer | React | Next.js | TypeScript

Johannesburg, South Africa | (+27) 73 591 6966 | seanmkhabela@icloud.com | github.com/SeanMkhabela | linkedin.com/in/sean-bailey-mkhabela-4806b7208

Open to remote roles (based in South Africa, SAST/UTC+2)

PROFESSIONAL SUMMARY

Front-end engineer with over 5 years of experience delivering modern, scalable, user-focused web applications across SaaS, e-commerce and financial platforms. Strong in React, Next.js, TypeScript, HTML5 and CSS3, with a track record of performance optimisation (code splitting, lazy loading, caching), CI/CD reliability and production stability. Progressed to Lead Frontend at a fintech platform, mentor junior developers, and work comfortably with clients and distributed, cross-functional Agile teams, including remote work for a U.S. company.

CORE SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3
Frameworks: React, Next.js, Express.js, MERN stack
Front-end practice: Performance optimisation (code splitting, lazy loading, caching), responsive and cross-browser UI, reusable components, code reviews
Tools & platforms: Git, Docker, AWS, CI/CD, REST/GraphQL APIs, Shopify, HubSpot CRM, Figma, Adobe XD
Ways of working: Agile, distributed remote teams, client engagement, mentoring
Other: AI development & R&D, UI/UX design

PROFESSIONAL EXPERIENCE

Senior Web Developer (Permanent) April 2026 – Present

Britehouse

- Develop and maintain Next.js web applications with a focus on performance, scalability and seamless user experience.
- Optimise application performance with code splitting, lazy loading and caching strategies in Next.js.
- Diagnose and fix CI/CD pipeline failures, improving build reliability and speeding up deployment cycles for the team.
- Conduct code reviews and contribute to front-end best practices for clean, maintainable, well-tested codebases.
- Troubleshoot and resolve front-end bugs across production and staging environments, improving platform stability.
- Work on AI initiatives, designing and building AI-powered solutions alongside core web development.

Software Developer Dec 2022 – Sept 2025

MethodData (USA) – remote, U.S. company

- Developed and maintained React front-end applications in TypeScript with responsive, scalable, high-performing interfaces.
- Translated UI/UX wireframes into production-ready code, optimised for speed and cross-browser/device compatibility.
- Worked remotely with distributed teams (designers, backend engineers, product managers) in Agile sprints, contributing to planning and reviews.
- Engaged directly with U.S.-based clients in meetings and project reviews, giving technical input and feasibility insights before development to align with business goals.
- Assisted junior developers, reviewed code and hosted monthly team-building sessions to strengthen collaboration.

Key achievement: successfully deployed 5+ U.S. web platforms with stable post-launch performance.

Frontend Engineer (Junior Developer to Lead Frontend) Oct 2022 – Feb 2025

Livestock Wealth (South Africa)

- Built and enhanced React + TypeScript features including the KYC dashboard, onboarding flows and user profile pages.
- Progressed from Junior Developer to Lead Frontend in the second year, taking ownership of key features and mentoring teammates.
- Integrated HubSpot CRM into the platform, automating customer lifecycle tracking and reducing manual workflows.
- Contributed to the launch and growth of livestockwealth.com, delivering responsive, high-performing user experiences.

Junior Frontend Developer June 2021 – Sept 2022

Yiya Kude, Johannesburg

- Developed new features for a MERN-based cloud phone system.
- Prototyped designs in Figma/Adobe XD, reducing design-to-development cycle times.
- Collaborated with designers and backend developers to integrate APIs and ensure seamless data flow.
- Optimised front-end performance by reducing load times, and fixed bugs to improve stability.

Freelance Web Developer Jan 2019 – June 2021

MKHBYDSGN

- Built full-stack MERN projects end to end, from client brief and requirements through design, prototyping, deployment and maintenance.
- Delivered SEO-optimised websites and Shopify stores for small businesses.
- Integrated APIs and third-party services (REST/GraphQL, payment gateways, CRM tools) into client projects.
- Created reusable, modular React/TypeScript components to speed up development and keep codebases clean.

EDUCATION

National Diploma in Software Development (NQF 6) – in progress Jan 2018 – In progress

Rosebank College, Braamfontein

Hands-on coursework in building functional applications and database design.

Grade 12 / National Senior Certificate (NQF 4) Jan 2013 – Dec 2017

Boksburg High School

Prefect 2016–2017. Subjects included CAT (Computer Applications Technology), EGD (Engineering Graphics and Design) and History.

CERTIFICATIONS

- IBM Blockchain Essentials V2 (2022)
- Responsive Web Design – freeCodeCamp (2020)
- React JS: Complete Guide for Frontend Web Development – Udemy (2020)
- Master JavaScript: From Basics to Advanced – Udemy (2020)

PRACTICAL EXPERIENCE (FORAGE JOB SIMULATIONS, 2025)

- PepsiCo Advanced Software Engineering Job Simulation
- New York Jobs CEO Council Software Engineering Job Simulation
- AWS APAC Solutions Architecture Virtual Experience Program
- Accenture North America Coding: Development & Advanced Engineering Job Simulation
